Invite you to a lecture on

Ecosystem of Telecommunication Services: A Data Perspective

Abstract:

The Telecommunication Space has been evolving and changing enormously without any boundaries. With IT, ICT & data taking over the Communication space, there is a change in the ECOSYSTEM. The Industry is literally going through a major transformation creating opportunities and challenges for all stakeholders including the policy makers & regulators, which calls for a different approach to be adopted. The OTT concept has brought in new players like OTT providers and has paved way to provide content and application services on top of the existing communication infrastructure. The talk will discuss about this journey and the need for effective governance to ensure better customer experience. We will also discuss the vulnerable points from both network & customer perspective and the security measures to be taken to ensure safe and secure communications.

D. M. EZHIL BUDDHAN

**Principal General Manager ,
Broadband Networks,
Bharat Sanchar Nigam Limited
(BSNL)
Bangalore**

**8th March 2019 Friday @ 6:15 PM
