

**Panel Discussion on**  
**THE FUTURE AND PROMISE OF**  
**ARTIFICIAL INTELLIGENCE**

AI might be the biggest event in human history. Some experts worry, though, that it might also be the last, unless we learn to align the goals of AI with ours before it becomes super intelligent. Can robots and machines rule us in the foreseeable future? What are the possible social, economics and commercial challenges? Lets debate these and some other questions!

**Mr. M Venkataraman**
