

MAGIC OF SCIENCE

The session aims at introducing children to the magic of science through some simple, visually appealing experiments in physics and chemistry. Instilling a passion for learning and knowledge in children from marginalized communities will help them move forward and achieve their dreams.

Bhama Sridharan

Faculty, Anubhava Science Foundation
Karnataka State Council for Science &
Technology (KSCST)

Bhama Sridharan holds a Masters degree from McGill University. She has worked for 16 years as a software consultant/engineer for various IT companies. She has a passion for the pure sciences, and in order for children to discover, experience and enjoy science. Currently Bhama is working as a consultant to Dream School Foundation, an NGO working with government schools, to help with the science and math learning of the underprivileged children. She is also a faculty of Anubhava Science Foundation (ASF), which along with Karnataka State Council for Science & Technology (KSCST), has been conducting a one year in-service science course for government school teachers.
