

This logo is a simple depiction to illustrate that gender equity, inclusivity, and diversity are all essential for harmonious existence and overall progress. The logo makes use of the widespread and familiar symbols representing male, female, and transgender sexes, and also incorporates colour elements to highlight the ever-growing need to acknowledge and accept diverse individual identities in every aspect of public and work life. The colour elements in the logo are used to highlight the name of the project itself - GATI. The symbols standing together bounded by a circle imply cohesion and togetherness. The smiling female face within the female symbol, standing tall, reflects and emphasizes the major objectives of the GATI project, and the stylized flag is a nod to the name of the project; both these elements are modelled to reflect the indigenous nature of the project. GATI is expanded and written in the font Arial Rounded MT Bold
